A.R.T.S. in partnership with Media Makers has organized the second edition of risk analysis conference titled, RISK ANALYSIS, THE FOUNDATION OF PROTECTION AGAINST FIRE AND BURGLARY.

About 200 guests from among the professional and trade associations, banks, insurance and certification companies, critical infrastructure and the academic fields, consultancy companies, communications, IT, security guards, retail, risk assessors at physical security, authorities, media and A.R.T.S. members attended the conference.

BUCHAREST, MAY 22

Smart EDU Conference

SMART EDUCATION & TRAINING We live in the age of technology, and everything around us becomes “smart” - from tools to organizations and communities. In this context, we must ask ourselves: How do we prepare for this future and how Romanian School prepares the young generation for trades that still not there? More importantly, how can involve the private sector in this process?

ARTS is Co-organizer of this event which we propose to open discussions path between the main actors which influence this process: Universities, Central and local Administrations, private and public Companies from ICT, mobility, energy and utilities.

BUCHAREST, JUNE 8

A.R.T.S. National Conference

A.R.T.S. National Conference: „PERSPECTIVES IN PRIVATE SECURITY – SOCIAL VALUE OF SECURITY SERVICES”. Reached the ninth edition, the event will bring to the attention of audience regional security market but also Romanian security solutions awarded abroad: Parking Spotter Solution developed by Siel Invest and Helinick – A.R.T.S. members - ended with the best result: 1st Prize at the Milestone Integration Platform Symposium (MIPS), San Antonio/Texas USA from February 2017 and also, Outstanding Security Performance Awards (OSPA) winners.

In two panels of the Conference will be discussed the following topics: Cyber-physical systems security, the challenge of the coming years for the private security sector and Modern fire protection systems – the role in social security.

E-MOBILITY AND CONECTIVITY - Electric transport in Romania, from European challenge to locally tangible results. This event is part of SMART CITIES OF ROMANIA, organized by A.R.T.S., National Committee of World Energy Council, Romanian Organization for the implementation of Intelligent Transport Systems and ITS Events Management.

BUCHAREST, JUNE 13

E-Mobility And Conectivity
Conference

Electric vehicles market is still in the early phase in Romania. Even though sales of green cars (electric and hybrid) recorded locally an additional 110% in 2015 and increase of almost 90% in the first two months of the 2016 (according to APIA), our country is still on the last places in Europe. However, there is a real interest in promoting e-mobility in Romania and there are already a number of concrete results.

In the panels of the Conference will be discussed the following topics: e-mobility and alternative fuels, mobility as a service, traffic and transport management, safety and security in transport.

SMART GOVERNANCE FOR SMART CITIZENS. The third edition of the Expo-Conference "Smart Cities of Romania" follows the objectives of National Territorial Development Partnership and proposes to evaluation the most relevant projects and Urban Solutions.

BUCHAREST, OCTOBER 11-12

SCOR Expo-Conference

This is the main event of the series of Smart Cities of Rmania, organized by A.R.T.S., National Committee of World Energy Council, Romanian Organization for the implementation of Intelligent Transport Systems and ITS Events Management.

In the panels of the Conference will be discussed the following topics: The need for a "National Partnership" for urban development of intelligence; Smart cities of Romania; Projects and Urban Solutions; public procurement Workshop for the smart city projects.
